

CoCubes / Aon 2–3 Day Score Boost Vault

This is an Obsidian-ready vault for rapid placement assessment preparation.

Use [00_Start_Here/Dashboard.md](#) as the home page.

What this vault covers

- Aptitude: Quant, English, Reasoning
- Technical MCQs: Data Structures, OS, Embedded Systems, DAA, Networking, SDLC, QA/testing
- Pseudocode tracing
- Coding round patterns
- Gamified assessment: planning, memory, deductive reasoning, numeracy
- Formula sheets
- PYQ-style/publicly repeated question patterns
- Timed mocks and answer keys

Important note on PYQs

Exact CoCubes/Aon question banks are proprietary and randomized. This vault therefore separates:

- [PYQ-style](#) : questions modeled from publicly repeated patterns and common placement-paper formats.
- [Publicly repeated patterns](#) : problem types reported across practice/prep sources.
- [Practice mocks](#) : original questions built to match timing and difficulty.

Use these for score improvement, not as a leaked-paper substitute.
